

EEA ENVIRONMENT POLICY

The European Environment Agency (EEA) is an agency of the European Union mandated to help achieve significant and measurable improvement in Europe's environment and to support sustainable development. In that role we recognise that we have a special responsibility to act as a role model when it comes to managing our own environmental performance.

Like all organisations we consume natural resources and pollute the environment through our daily operations. In order to minimise our environmental impacts and continually improve our performance, we have in place an environmental management system, which complies with the Eco-Management and Audit Scheme (EMAS).

Our vision is to be a climate friendly and resource efficient organisation and in that context we are committed to:

- continuously improving our energy and material efficiency
- maintaining staff's awareness and understanding of environmental issues at a high level and encouraging the sharing of ideas for environmental improvement
- making use of own experience and accumulated knowledge in managing environmental performance to influence and inspire sister organisations (other EU bodies and institutions)
- complying with all environmentally relevant legislation and regulations of our host country

This environment policy covers Agency's operations and staff, also when on missions and travelling to and from work. The policy applies also to all other persons working at the Agency's premises.

March 2018

Hans Bruyninckx
Executive Director
